WORK EXPERIENCE

EZ-AD TV Inc

Full Stack Developer

2025 - PRESENT

- Developing and maintaining web applications using modern PHP, Node JS frameworks and JavaScript technologies.
- Collaborating with cross-functional teams to deliver high-quality web solutions.
- Implementing responsive designs and optimizing application performance.
- Working with databases and server-side technologies to ensure robust backend functionality.

UGC-Gaming.NET

Full Stack Developer

2022 - 2025

- Developed and maintained internal tools and systems, enhancing efficiency across all departments.
- Built a complete staff area system from scratch, improving task management and operational workflow.
- Managed Linux infrastructure including server configuration, SSL certificates, and DNS handling with automated deployments.
- Modernized company websites with clean code following MVC patterns, resulting in 40% improved performance.

PROJECTS

RealTime Call Management System

NodeJS and TypeScript

- Developed a real-time incoming call management system for customer service operations using Node.js, TypeScript, and Fastify. The web-based platform enables agents to receive, accept, or decline incoming calls directly through their browser interface, streamlining customer service workflows and eliminating the need for traditional phone hardware.
